# Varun Talluri

(248)-496-4483 | talluriv@umich.edu | LinkedIn | Website | U.S. Citizen

## Education

**University of Michigan** — **Ann Arbor, MI**
*B.S.E. Computer Science | B.B.A. Product Management (Ross School of Business)* — *May 2027*

- **GPA:** 3.97/4.0
- **Coursework:** Machine Learning, Distributed Systems, Operating Systems, Data Structures & Algorithms, Computer Architecture, Databases, Web Systems, Mobile App Design, Theory of Computation, Computational Linear Algebra

## Experience

**Palantir Technologies** — **Washington DC**
*Incoming Forward Deployed Software Engineer Intern* — *2026*

**Ford Motor Company** — **Dearborn, MI**
*Software Engineer Intern, ADAS* — *June 2024 – Aug 2024*

- Built a PyTorch-based computer vision system achieving 95% accuracy in risky driving detection using synthetic and real data, processing up to 7,500 images per day from vehicle camera pipelines to enable fleet-level driving insights
- Scaled distributed training workloads on CUDA-enabled HPC clusters, reducing runtime from 2 hours to 25 minutes
- Optimized data preprocessing and training pipeline with batching and caching, improving throughput by 15%

**Ford Motor Company** — **Dearborn, MI**
*Software Engineer Intern, Data Reliability* — *June 2023 – Aug 2023*

- Implemented LOF for anomaly detection, analyzing 10,000+ weekly GCS uploads, improving precision from 65% to 83%
- Integrated detection pipeline into production workflows for 30+ engineers, reducing downtime from data anomalies

**McKinsey & Company** — **Detroit, MI**
*Business Analyst Intern* — *June 2025 – Aug 2025*

- Engineered multi-agent pipelines by orchestrating custom RAG agents, reducing 2 weeks of multi-consultant work
- Rebuilt SG&A benchmarking pipeline with automated data ingestion and updates, reducing turnaround time by 60%

**University of Michigan** — **Ann Arbor, MI**
*Teaching Assistant, ROB 101* — *Jan 2024 – Present*

- Taught 1,000+ students across semesters through robotics-based projects applying linear algebra to real-world systems
- Built automated pipelines on Vocareum to give feedback on code submissions, reducing instructor grading time by 60%

## Projects

**Portfolio Analytics Platform | *React, Flask, LLM, Gemini API, Google Stitch***

- Developed a portfolio analytics engine managing $80K+ in assets, integrating market data APIs with sentiment analysis to inform rebalancing strategy; implemented quantitative risk metrics, such as Sharpe Ratio and covariance

**Distributed Search Engine | *Python, Hadoop, MapReduce, Socket Programming***

- Engineered a distributed search engine for 10,000+ documents using MapReduce pipelines with TF-IDF and PageRank-based ranking with fault-tolerant execution across 4 worker nodes with socket-based communication

**Energy Permit Intelligence Platform | *Python, Playwright, FastAPI, OCR***

- Built an asynchronous scraping pipeline across 15 municipalities, reducing manual permitting research from 4–6 hours per municipality to a single automated workflow used by 7 active users

## Skills & Honors

**Languages**: C++, Python, Java, JavaScript, SQL, Julia
**Technologies**: PyTorch, React, Flask, FastAPI, Hadoop, AWS, GCP, Docker, HPC, Weights & Biases
**Honors & Interests**: 1st Place, MHACKS 17 (Best Use of Intel AI); Tennis, Formula One, Viola
