

VARUN TALLURI

(248) 496-4483 | talluriv@umich.edu | [LinkedIn](#) | [Website](#) | U.S. Citizen

Education

University of Michigan

Ann Arbor, MI

B.S.E. Computer Science | B.B.A. Product Management, Ross School of Business

May 2027

- **GPA:** 3.97/4.0
- **Coursework:** Distributed Systems, Operating Systems, Machine Learning, Data Structures & Algorithms, Computer Architecture, Web Systems, Mobile App Design, Theory of Computation, Computational Linear Algebra

Experience

Palantir Technologies

Washington, DC

Incoming Forward Deployed Software Engineer Intern

Summer 2026

Ford Motor Company

Dearborn, MI

Software Engineer Intern, ADAS Computer Vision

Jun 2024 – Aug 2024

- Built PyTorch CV classifier for risky-driving detection, reaching 95% accuracy on synthetic/fleet camera data
- Scaled 4-GPU CUDA/HPC training, cutting runtime from 2 hours to 25 minutes with batched loading and parallel jobs
- Standardized reproducible ADAS experiments with Weights & Biases tooling and reusable preprocessing utilities

Ford Motor Company

Dearborn, MI

Software Engineer Intern, Data Reliability Platform

Jun 2023 – Aug 2023

- Built LOF anomaly detection pipelines for 10,000+ weekly GCS uploads, improving precision from 65% to 83%
- Integrated production monitoring and alerting used by 30+ engineers, reducing downtime from corrupted vehicle uploads

McKinsey & Company

Detroit, MI

Business Analyst Intern

Jun 2025 – Aug 2025

- Built AI orchestration pipelines for retrieval-augmented document synthesis, eliminating 2 weeks of manual analysis
- Automated SG&A benchmark ingestion pipelines, reducing recurring client turnaround time by 60%

University of Michigan

Ann Arbor, MI

Teaching Assistant, ROB 101

Jan 2024 – Present

- Mentored 1,000+ students on robotics projects involving optimization, LiDAR mapping, and balancing control systems
- Built automated grading infrastructure on Vocareum, reducing instructor evaluation overhead by 60%

Projects

Energy Permit Intelligence Platform | *Python, FastAPI, Playwright, OCR*

- Built async FastAPI platform with rate-limited Playwright crawlers and OCR extraction across 15 municipalities
- Reduced 4–6 hours of municipal research to one workflow with concurrent crawling and classification pipelines

Kiwifruit | *SwiftUI, Firebase, Screen Time API, REST APIs*

- Built SwiftUI reading app with adaptive challenge generation from multimodal inputs and contextual APIs
- Integrated Screen Time APIs, Firebase, local persistence, and realtime personalization to improve engagement

Distributed Search Engine | *Python, Hadoop, MapReduce, Socket Programming*

- Built distributed search engine indexing 10,000+ documents with Hadoop MapReduce, TF-IDF, and PageRank retrieval
- Implemented distributed indexing and socket-based query coordination for parallel processing and resilient execution

Skills & Honors

Languages: Python, C++, Java, SQL, JavaScript, Julia

Frameworks: PyTorch, FastAPI, React, Flask, Hadoop, Docker, Firebase, Playwright, Weights & Biases

Systems: Distributed Training, HPC, MapReduce, Async Pipelines, CUDA, AWS, GCP

Honors: MHACKS 17 Winner, Best Use of Intel AI
